Author: Stephanie Brozo

When spiking the bag of fluid with the KCl, why is it important to clamp off the bag of fluids and stop the fluid pump before administering the KCL?

Please choose only one answer:

- A large volume of KCL can cause tachycardia, which can cause an arrhythmia
- A large volume of KCL can cause the heart to abruptly stop, causing cardiac arrest
- A large volume of KCL can cause sever vasoconstriction, with lowers cardiac output, therefore causing poor perfusion and the patient can go into shock.
